

## LangGraph AI Agent Evaluation Dataset

### RAG PDF-Based Questions:

1. What is LangChain used for?
2. Explain the role of Qdrant in modern AI systems.
3. Why is clean data important for machine learning models?
4. How does data bias impact decision-making in AI?
5. Describe how LangChain integrates external APIs into LLM workflows.
6. What challenges are associated with digitization and automation in global economies?
7. What are the consequences of rising sea levels on coastal cities?
8. How does Qdrant support retrieval-augmented generation pipelines?
9. What global shifts require changes in economic policies?
10. Why is structured data essential for effective AI training?

### Weather API-Based Questions:

1. What is the current weather in New York?
2. What is the temperature in London right now?
3. Is it raining in Tokyo?
4. Give the weather forecast for Paris tomorrow.
5. How humid is it currently in Singapore?
6. What is the wind speed in Chicago?
7. Is there any weather alert in San Francisco?
8. What is the temperature in Dubai today?
9. Is it snowing in Toronto?
10. Give me a summary of the current weather in Sydney.
